

Cyto Rotor: New and only from Hettich

Reliable protection against infectious aerosols

AEROSOL-
TIGHT*

MAXIMUM SAFETY: CYTO ROTOR WITH CERTIFIED BIOCONTAINMENT

Cytologists have been waiting for it for a long time, and now it's finally here: the cyto rotor that can be sealed against biological hazards. The new Hettich cyto rotor 1515-A is the first to have certified biocontainment*. This means maximum safety and optimum protection against infectious samples in centrifuging.

* Tested by the TÜV in conformity with DIN EN 61010, section 2-020.

Cyto Rotor

GOOD REASONS TO CHOOSE HETTICH PRODUCTS.

LARGEST SELECTION OF CYTO ACCESSORIES

Hettich has a bigger line of cytology accessories than any other manufacturer. All of the common methods for the production of cyto preparations can now be carried out in Hettich laboratory centrifuges.

SUBSTANTIAL COST SAVINGS

Cytology laboratories that have used alternative products to date (such as Shandon® centrifuges) can now use just a single Hettich centrifuge. There is no need to acquire a centrifuge solely for cytology purposes. Users who are already Hettich customers can use the new rotors in their existing ROTOFIX 32A and UNIVERSAL 320 models or their predecessors.

MAXIMUM FLEXIBILITY

The 12-place cyto are easy to insert and remove without the need for any tools.

MAXIMUM SAFETY

Hettich is the first and only manufacturer to offer a cyto rotor with biocontainment. This means optimum protection against infectious aerosols.

* Tested by the TÜV in conformity with DIN EN 61010, section 2-020

Cyto chamber 1534
(500 x)
Cyto chamber 1531
(50 x)
with white filter card for sample quantities in the range 200 – 500 µl

Cyto chamber 1532
(50 x)
with brown filter card for very small sample quantities up to 200 µl

Cyto chamber 1538
(12 x)
(reusable) for sample quantities up to 500 µl
Filter card 1539
(200 x)
for 1538

Cyto chamber 1533
(500 x)
Cyto chamber 1535
(100 x)
for volumes up to 6 ml (e.g., urine samples)

Cyto chamber 1536
(12 x)
(reusable) for volumes up to 6 ml (e.g., urine samples)
Seal 1537
(100 x)
for 1536
